Formula plugin acceptance - page 1

The left column contains ordinary research prose.

A display formula appears below this paragraph.

Reference [12] is a citation, not an equation.

The right column discusses numerical validation.

The result must preserve its original structure.

Figure 3 and Table 2 are not formula candidates.

$$x^2 = \frac{a}{b} \tag{1}$$

$$M = \begin{pmatrix} a & b \\ c & d \end{pmatrix} \tag{2}$$

Equation labels must be excluded from copied LaTeX.

Formula plugin acceptance - page 2

The left column contains ordinary research prose.

A display formula appears below this paragraph.

Reference [12] is a citation, not an equation.

The right column discusses numerical validation.

The result must preserve its original structure.

Figure 3 and Table 2 are not formula candidates.

$$E = m c^{2} \tag{3}$$

The expected expression is the mass-energy relation.

Formula plugin acceptance - page 3

The left column contains ordinary research prose.

A display formula appears below this paragraph.

Reference [12] is a citation, not an equation.

The right column discusses numerical validation.

The result must preserve its original structure.

Figure 3 and Table 2 are not formula candidates.

No display formula is present on this page.

A review should not convert paragraphs or labels into math.
